THE CHALLENGE

The Pain Points of E-commerce & Logistics

In e-commerce and logistics, the main factors that may cause a claim are:

01

Parcel Lost

Shipments go missing in transit with no proof of dispatch or handover.

02

Goods Damaged

Items arrive broken, with no record of their condition at packing.

03

Quantity is Less

Buyers report missing units, with no evidence of what was actually packed.

SMARTX

WHY IT PERSISTS

Limitations of the Existing System

To resolve a dispute, retailers must find the facts and evidence — but today's systems fall short:

No Video Recording

for the full dealing process

No Video Tracking

across separate facilities

Low Operation Efficiency

in searching for evidence

SMARTX

LET'S TALK ABOUT

The Solution

High Resolution

Deploy HD cameras across every step of the parcel-dealing process and keep recording the entire workflow.

Visual Parcel Tracking

A unified platform manages all cameras across facilities and tracks each parcel transfer by video.

Software-based Video Download

Search evidence by order number and retrieve clips in seconds — shortening complaint handling dramatically.

END USER VALUE

Reduce manpower & claim loss

Improve operation efficiency

Improve competitive advantage

SMARTX

PROVEN IN THE FIELD

Trusted by Leading Brands

A growing roster of retail, fashion and logistics companies rely on SecurePack360.

Video Management System (VMS)

Camera-based Parcel Tracking, Linked to Scanning

HD Camera

1

Deploy high-resolution cameras across every step of the parcel-dealing process.

Barcode Scanning System

2

The order ID is scanned and automatically linked with the CCTV recording.
